

STEVEN GARRIDO

Data Engineer at Chubb Insurance

stevenagarrido@gmail.com | 908.914.7414 | linkedin.com/in/stevenagarrido | stevengarrido.com

Professional Summary

Data Engineer with three years of experience designing, optimizing, and deploying large-scale ETL pipelines, and supporting production level data systems. Highly proficient using SQL, Python, Java, and Databricks. Skilled in scalable pipeline development and exploratory analysis, with a proven ability to transform complex datasets into actionable insights that drive product performance and data-driven decision making for cross-functional stakeholders. Demonstrates excellent problem-solving skills, ability to collaborate effectively, and deep desire to learn.

Skills

Program Languages: SQL, Python, Java

Technologies: Databricks, Microsoft Azure, Cosmos, Snowflake, Tableau, IICS, Command Line

Education

University of Maryland, College Park, MD

Graduated May 2022

Bachelor of Science, Computer Engineering

Experience

Chubb Insurance

April 2023 - Present

Data Engineer

- Utilized SQL to develop, test, and deploy views, stored procedures, and tables to facilitate the transformation of large-scale data sets, driving consistency and stability within datasets.
- Leveraged Python to build and optimize automated data extraction and transformation processes, preparing source data from SQL tables and on-premises files for specially curated business stakeholders needs, ensuring all stakeholder needs are fulfilled.
- Used Databricks to create processes to load and transform normalized data from SQL server tables for timely delivery into Azure Cosmos databases and accurate delivery of data.
- Collaborated closely with business analytics teams to analyze incoming source system data, and author documentation outlining the necessary data transformations to fit business rules, resulting in a greater understanding of the business requirements, and the context of datasets.
- Constructed dashboards in Tableau visualizing policy and quote data, enabling business analysts to monitor key trend metrics and drive data-driven decision-making.
- Designed and implemented data quality checks and validation frameworks to ensure modeled metrics were fit for purpose and to reinforce end-user trust in underlying data.
- Monitored data pipelines and troubleshoot data issues reported by consumers to minimize defects and optimize performance of data pipelines, strengthening data integrity.

Nuance Communications (Intern)

May 2021 - August 2021

Software Engineer

- Built, tested, and deployed production-level code using GitLab, ensuring high-quality and scalable solutions for internal analytics and AI services.
- Accumulated end user requirements then designed, tested, and implemented solutions for new system features and pre-existing defects.
